San Francisco: 415.954.4497

Winston Liaw represents high technology companies in patent infringement litigation and other intellectual property matters. His clients have included cloud services, semiconductor, multimedia, telecommunications, and web technology companies, among others. Winston has advised and represented clients in nearly all aspects of patent litigation and mediation, including claim construction, expert discovery, and infringement and validity analyses, and has counseled clients on patent acquisition and portfolio development.

Recent experience includes:

- Defending patent infringement lawsuits related to cloud services and web technologies in the Western District of Texas.
- Defending patent infringement lawsuits related to semiconductor manufacturing and telecommunications infrastructure in the Northern District of California.
- Representing a flexible hose designer and manufacturer in asserting its patents in the District of Delaware.
- Representing a telecommunications company in asserting its patents related to networking technology in the Northern District of Texas.
- Representing a multimedia company in asserting its patents related to multimedia recording and playback in the Eastern District of Texas.

Winston brings a passion for technology to his legal practice. Prior to his legal career, he earned a degree in electrical engineering and computer science and served five years at Microsoft Corporation as a software development engineer and program manager.

Experience

Profectus Technologies v. Google LLC

Represented Google LLC in its complete defense verdict from a Texas federal jury in the Western District of Texas in a case alleging that Google's Nest Hub and Nest Hub Max devices infringed a patent asserted by Profectus Technologies. The jury found that the asserted claims of the patent were invalid and that Google

did not infringe.

Networking and Cybersecurity Solutions Company Patent Infringement Lawsuit

Represented a multinational networking and cybersecurity solutions company in a 6-patent infringement lawsuit in the Western District of Texas and in the related IPR proceedings. The lawsuit accused a broad range of data center-related technology, including routers, switches, firewall devices, and the company's operating system of infringement. The matter resolved with a settlement favorable for our client.

Biotech IP Infringement

Represented a bio-tech company in patent infringement litigation, licensing disputes and IP counseling relating to its pharmaceutical products.

DNA Sequencing IP Dispute

Represented a molecular testing company in connection with patent infringement litigation relating to DNA sequencing testing machine technology in the Northern District of California.

Hall Data v. Dropbox

Defended Dropbox in patent proceedings related to database synchronization technologies initially filed in the Eastern District of Texas. After successfully obtaining transfer of the action from the Eastern District of Texas to the Northern District of California, we obtained a dismissal with prejudice on behalf of our client following a court-ordered settlement conference.
